Study Title

Driving Simulation-Based Teaching Effectiveness Study in Transportation Engineering

Purpose of the Study

This study aims to evaluate the instructional effects of driving simulation-assisted teaching in a transportation engineering course, with particular attention to knowledge learning, scenario-based analytical ability, and learning experience.

Study Procedures

If you agree to participate, the study will collect data generated during the course learning process, including: (1) Basic background information; (2) Knowledge pre-test and post-test results; (3) Responses to scenario-based analysis tasks; (4) Learning experience questionnaire responses.

Voluntary Participation

Participation in this study is completely voluntary. You have the right to refuse to participate or withdraw from the study at any time. Refusal to participate or withdrawal from the study will not affect your course learning, course grades, teacher-student relationship, or any other rights.

Risks and Benefits

This study is a low-risk educational research project. It does not involve medical intervention, invasive procedures, or the collection of sensitive biological information. Participation in this study may help improve course teaching design and learning support.

Confidentiality

The research data will be used only for educational research and academic publication. All data will be anonymized during analysis and reporting. Your name, student ID, or any other personally identifiable information will not be disclosed. The research findings will be presented only in aggregated or anonymized form.

Consent to Publish

I agree that the researcher may use anonymized and aggregated research findings for academic journal articles, conference presentations, and other scholarly communications. I understand that no published content will contain information that can identify me personally.

Participant Statement

I confirm that I am 18 years of age or older and have the ability to make an independent decision about participation. I have understood the purpose of the study, the study procedures, the use of data, the confidentiality measures, and the voluntary nature of participation. I agree to participate in this study and agree that anonymized and aggregated data may be used for educational research and academic publication.
